

United States Government
2005 Trade Capacity Building Assistance (\$US)
GAMBIA

Activity Title	Activity Description	TCB Category	FY 05 Total
Petroleum Product Storage Depot	The U.S. Trade and Development Agency (USTDA) has committed \$393,978 towards a cost-shared feasibility study for the feasibility analysis of the establishment of a new petroleum products depot in The Gambia represents the support of USTDA for a key infrastructure development project in the country. The existing facility is outdated and presents significant environmental risks for the city of Banjul because of its location in the city center. The existing site also represents a significant energy security risk as it does not have capacity for expansion to meet demand in the country. The feasibility study will analyze two possible sites for a new petroleum depot in the country and make a determination of the most feasible option. Funded and implemented by Trade and Development Agency.	Physical Infrastructure Development	393,978
